WOOD ELEMENTS & HIGH GLOSS PANELS

## ACRYL-VISION

The achieved unique high and depth glossy brilliance beside the increasingly demands in MATT FINISHING colours is the result of our skills and experiences and a selected thick acrylic foil.

A more stylish approach is reachable using this mixed solution of metallic particles incorporated into the high gloss foil. The tiny pieces reflect the light and shine as a real pearl.

Il nostro lavoro e le nostre competenze ci hanno permesso di raggiungere elevati standard di brillantezza sul lucido e , seguendo le nuove tendenze, abbiamo realizzato la finitura OPACA.

Una soluzione di stile è data dalla finitura METALLIZZATA. Un mix di particelle metalliche inserite nella lastra di acrilico riflettono e brillano alla luce.

Notre travail et nos compétences nous ont permis d'atteindre des niveaux élevés de brillant sur le polie et suivantes les nouvelles tendances nous avons créé le fini mat.

Une solution d'élégance est donnée par la finissage métallique. Un mélange de particules métalliques noyées dans le panneau acrylique réfléchit et brille la lumière.

## MIRROR

Research and development has been awarded with this ACRYLIC MIRROR SCRATCH RESISTANT product with flat surface and reflection quality as well as glass mirror. Significant weight reduction, nor shatter neither crack risk and easy worked with standard tooling make this product suitable for several application.

La costante ricerca è stata premiata dal nostro pannello SPECCHIO ANTIGRAFFIO. Una superficie perfettamente liscia e riflettente come un vero specchio, abbinata alla significativa riduzione di peso e alla assenza di rischio di scheggiature ne fanno un prodotto estremamente sicuro e facilmente lavorabile.

Recherche et développement à nous permis de réaliser un panel de miroir acrylique résistant aux rayures. Une surface parfaitement lisse et réfléchissante comme un vrai miroir, combinée à la réduction significative du poids et l'absence de risque d'écaillage en font un produit extrêmement sûr et facile à travailler.

## ACRYL-VISION ANTI SCRATCH

The scratch resistant acrylic is a combination of shiny appearance with a high resistant surface treatment. The result is a mechanically resistant product.

Il pannello antigraffio è un'ottima soluzione per ottenere una perfetta lucentezza combinata con una elevata resistenza al graffio.

Le panneau inrayable est une excellente solution pour une brillance optimale combinée à une résistance élevée aux rayures.

## PET

The application of this technique is a result of our new production line. The PET foil is a thin foil with HIGH GLOSS or SUPERMATT appearance taking care of environmental requirements.

La nostra nuova linea di produzione ci permette di realizzare pannelli con applicata la foglia in PET, prestando perciò attenzione e valorizzando i prodotti ecologici.

Notre nouvelle ligne de production nous permet de produire des panneaux avec la feuille en PET, qui se prête à mettre en valeur les produits les plus respectueux de l'environnement.

## ACRYL-GLASS

In a furniture world flooded with shiny request PALUDET has undertook the elegant path of making sophisticated glass-effect on the surfaces. This solution gives to the furniture designer or architects a growing appeal collection.

Le richieste di prodotti brillanti hanno portato la PALUDET a percorrere una nuova strada realizzando la sofisticata superficie con effetto vetro. La collezione si arricchisce di un prodotto pregiato che attira l'attenzione di designer e architetti.

Les demandes de produits brillants ont conduit la société Paludet à changer de route en réalisant la surface sophistiquée avec effet de verre. Notre collection est enrichie d'un nouveau produit précieux qui attire l'attention des designers et des architectes.

## FELIX DESIGN

PALUDET collection has been embellished with new FELIX-DESIGN line. Brushed steel or honed titanium are the trendy and stylish decors that with its own matt finish are pleasantly matched with our high glossy line.

La nostra collezione si arricchisce della nuova linea FELIX-DESIGN con le nuove finiture titanio spazzolato e acciaio.

Le ultime tendenze e i nuovi prodotti di design richiedono effetti metallici spazzolati e/o opachi che vengono piacevolmente accostati ai nostri lucidi.

Notre gamme s'enrichit de la nouvelle collection FELIX-Design avec les nouvelles finitions titane brossé et acier.

Les dernières tendances et les nouveaux produits design demandent des effets métalliques brossés et/ou mat qui peuvent être associés à nos produits brillants.
